DBLP BROWSE SEARCH ABOUT NFDI STOP THE WAR!

For some months now, the dblp team has been receiving an **exceptionally high number of support and error correction requests** from the community. While we are grateful and happy to process all incoming emails, please assume that **it will currently take us several weeks, if not months**, to read and address your request. Most importantly, **please refrain from sending your request multiple times**. This will not advance your issue and will only complicate and extend the time required to address it. Thank you for your understanding.

Joint Declaration: **The freedom of science is at the heart of liberal, democratic societies.** Without this freedom, it is impossible for scientific efforts to be geared toward gaining knowledge and facts. It is therefore extremely worrying that the scientific freedom is coming under increasing pressure in various regions of the world. **(read more)**

in version-Space Induction. 43-48

Jason Catlett:
Peepholing: Choosing Attributes Efficiently for Megainduction. 49-54

Pang C. Chen:
Improving Path Planning with Learning. 55-61

Peter C.-H. Cheng, Herbert A. Simon:
The Right Representation for Discovery: Finding the Conservation of Momentum. 62-71

Alan D. Christiansen:
Learning to Predict in Uncertain Continuous Tasks. 72-81

Peter Clark, Robert C. Holte:
Lazy Partial Evaluation: An Integration of Explanation-Based Generalization and Partial Evaluation. 82-91

Jeffery A. Clouse, Paul E. Utgoff:
A Teaching Method for Reinforcement Learning. 92-110

Darrell Conklin, Janice I. Glasgow:
Spatial Analogy and Subsumption. 111-116

Timothy M. Converse, Kristian J. Hammond:
Learning to Satisfy Conjunctive Goals. 117-122

Michael T. Cox, Ashwin Ram:
Multistrategy Learning with Introspective Meta-Explanations. 123-128

Oren Etzioni:
An Asymptotic Analysis of Speedup Learning. 129-136

Oren Etzioni, Steven Minton:
Why EBL Produces Overly-Specific Knowledge: A Critique of the PRODIGY Approaches. 137-143

Tom Fawcett, Paul E. Utgoff:
Automatic Feature Generation for Problem Solving Systems. 144-153

Cao Feng, Stephen H. Muggleton:
Towards Inductive Generalization in Higher Order Logic. 154-162

Douglas H. Fisher, Ling Xu, Nazih Zard:
Ordering Effects in Clustering. 162-168

Attilio Giordana, Claudio Sale:
Learning Structured Concepts Using Genetic Algorithms. 169-178

Jonathan Gratch, Gerald DeJong:
An Analysis of Learning to Plan as a Search Problem. 179-188

John J. Grefenstette, Connie Loggia Ramsey:
An Approach to Anytime Learning. 189-195

Ray J. Hickey:
Artificial Universes - Towards a Systematic Approach to Evaluation Algorithms which Learn form Examples. 196-205

Daniel S. Hirschberg, Michael J. Pazzani:
Average Case Analysis of Learning kappa-CNF Concepts. 206-211

Elizabeth I. Hogger, Krysia Broda:
The MENTLE Approach to Learning Heuristics for the Control of Logic Programs. 212-217

Lawrence B. Holder, Diane J. Cook, Horst Bunke:
Fuzzy Substructure Discovery. 218-223

Lawrence Hunter, Nomi L. Harris, David J. States:
Efficient Classification of Massive, Unsegmented Datastreams. 224-232

Wayne Iba, Pat Langley:
Induction of One-Level Decision Trees. 233-240

Cezary Z. Janikow:
Combining Competition and Cooperation in Supervised Inductive Learning. 241-248

Kenji Kira, Larry A. Rendell:
A Practical Approach to Feature Selection. 249-256

Igor Kononenko, Matevz Kovacic:
Learning as Optimization: Stochastic Generation of Multiple Knowledge. 257-262

Philip Laird:
Dynamic Optimization. 263-272

Stephane Lapointe, Stan Matwin:
Sub-unification: A Tool for Efficient Induction of Recursive Programs. 273-281

Rey-Long Liu, Von-Wun Soo:
Augmenting and Efficiently Utilizing Domain Theory in Explanation-Based Natural Language Acquisition. 282-289

Sridhar Mahadevan:
Enhancing Transfer in Reinforcement Learning by Building Stochastic Models of Robot Actions. 290-299

Chengjiang Mao:
THOUGHT: An Integrated Learning System for Acquiring Knowledge Structure. 300-309

Zdravko Markov:
An Approach to Concept Learning Based on Term Generalization. 310-315

R. Andrew McCallum:
Using Transitional Proximity for Faster Reinforcement Learning. 316-321

Thierry Van de Merckt:
NFDT: A System that Learns Flexible Concepts Based on Decision Trees for Numerical Attributes. 322-331

Marjorie Moulet:
A Symbolic Algorithm for Computing Coefficients' Accuracy in Regression.

332-337

Stephen H. Muggleton, Ashwin Srinivasan, Michael Bain:
Compression, Significance, and Accuracy. 338-347

Yves Niquil:
Guiding Example Acquisition by Generating Scenarios. 348-354

Arlindo L. Oliveira, Alberto L. Sangiovanni-Vincentelli:
Constructive Induction Using a Non-Greedy Strategy for Feature Selection. 355-360

Christian W. Omlin, C. Lee Giles:
Training Second-Order Recurrent Neural Networks using Hints. 361-366

M. Alicia Pérez, Oren Etzioni:
DYNAMIC: A New Role for Training Problems in EBL. 367-372

Ashvin Radiya, Jan M. Zytkow:
A Framework for Discovering Discrete Event Models. 373-378

David Ruby, Dennis F. Kibler:
Learning Episodes for Optimization. 379-384

Claude Sammut, Scott Hurst, Dana Kedzier, Donald Michie:
Learning to Fly. 385-393

Cullen Schaffer:
Deconstructing the Digit Recognition Problem. 394-399

Alberto Maria Segre:
On Combining Multiple Speedup Techniques. 400-405

Satinder P. Singh:
Scaling Reinforcement Learning Algorithms by Learning Variable Temporal Resolution Models. 406-415

Padhraic Smyth, Jeff Mellstrom:
Detecting Novel Classes with Applications to Fault Diagnosis. 416-425

Devika Subramanian, Scott B. Hunter:
Measuring Utility and the Design of Provably Good EBL Algorithms. 426-425

Somkiat Tangkitvanich, Masamichi Shimura:
Refining a Relational Theory with Multiple Faults in the Concept and Subconcepts. 436-444

Gheorghe Tecuci:
Cooperation in Knowledge Base Refinement. 445-450

Gerald Tesauro:
Temporal Difference Learning of Backgammon Strategy. 451-457

Gilles Venturini:
AGIL: Solving the Exploration Versus Exploration Dilemma in a single Classifier System Applied to Simulated Robotics. 458-463

Jerry B. Weinberg, Gautam Biswas, Glenn R. Koller:
Conceptual Clustering with Systematic Missing Values. 464-469

Jianping Zhang:
Selecting Typical Instances in Instance-Based Learning. 470-479

Jan M. Zytkow, Jieming Zhu, Robert Zembowicz:
The First Phase of Real-World Discovery: Determining Repeatability and Error of Experiments. 480-485
